

Data Migration short guide (Using Web browser)

Step 1 - Search www.Soliscloud.com

Step 2 – Click on **Data migration** option available on the landing page.

Step 3 – Anyone that was using the previous generation of Solis monitoring portal (Solis home/Solis professional) will need to migrate their systems over to the new platform. This is done by selecting “**Data migration**” on the login page. The original login credentials will need to be used here. Enter the email address and password and then click on “**Start migration**”.

Please note the migration takes a few hours to complete. Once migration is complete system will show up on the new platform. You can either use www.Soliscloud.com or Soliscloud mobile App.

End users select **Home Edition** as shown below and enter your login details, then proceed to click Start migration.

Data Migration

Professional Edition Home Edition

Input Ginlong Home Edition account

Input Home Edition password

Hint:

- 1.Migration will transfer the account and plant information of old platform to SolisCloud, and users can normally use SolisCloud
- 2.Basic data of plant takes 5–10 minutes, and all data of plant expected to be completed in 2 hours)
- 3.After the migration, please try to use the new platform
- 4.If there is an external organization in the organization, please contact the after–sales
- 5.If you have any questions about migration, please contact after–sales service@ginlong.com
